Licenses

Compatibility between GNU licenses
http://www.gnu.org/licenses/gpl-faq.html#AllCompatibility

Library	License
libgphoto2	GNU LGPLv3
gPhoto2	GNU GPLv3
OpenMVG	MPL2
Qt	GNU LGPLv3 or GNU GPLv3
Cmake	We will only use it as an external tool...

Wondering :
- Are these libraries licences compatible (in order to use them as library, not compiled programm)?
- Under which license shall we develop our code? Given that an MPL2 license seems to suit well the current openMVG requirement.

Platforms

Library	Linux	Windows	MacOS
libgphoto2	X		X
gPhoto2	X		X
OpenMVG	X	X	X
Qt	X	X	X
Cmake	X	X	X
